Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: Applicant submitted proposed amendment and discussed differences in cited references to invention as claimed. Applicant argues that while Ausschnitt teaches exposure dose and focus deviations being determined and then feedback to a next lot of substrates to be processed, present invention teaches obtaining information during pre-exposure processing on semiconductor device and providing that information as feed forward data. The Examiner appreciates these distinctions as described and will give them full consideration in the next office action.
